

Star Wars

US TOOLS OF SPACE SUPREMACY

LORING WIRBEL

A photograph of a Space Shuttle launching from a launch pad. The shuttle is oriented vertically, with its nose pointing upwards. It is surrounded by a large plume of white smoke and fire from its engines. The background is a clear blue sky. The shuttle is mounted on a mobile launcher platform (MLP) which is being moved by a crawler-transporter. The MLP is a large, rectangular structure with a complex internal structure. The crawler-transporter is a massive vehicle with multiple sets of continuous tracks, designed to move heavy loads across the launch complex. The shuttle is the central focus of the image, and the text is overlaid on it.
